Experiment-1

Create a Web Page for Course Curriculum: Use of Headings, Paragraphs, Bold, Italic, Underline, and Special Characters, Ordered List, Unordered List, Description List, Nested List, and Mixed Lists.

Objectives

1. To design a simple course curriculum webpage using HTML.
2. To practice the use of basic text formatting tags (bold, italic, underline, special characters).
3. To learn the implementation of ordered, unordered, description, nested, and mixed lists.
4. To understand webpage content structuring using headings and paragraphs.

Tools Required

- Computer / Laptop with any OS
- Text Editor (VS Code, Sublime Text, Notepad++)
- Web Browser (Chrome, Edge, Firefox)

Theory

1. Headings (<h1>…<h6>): Used to display titles and subheadings in different sizes.
2. Paragraphs (<p>): Defines blocks of text content.
3. Formatting Tags:
    - <b> for bold text
    - <i> for *italic text*
    - <u> for <u>underlined text</u>
    - Special characters are displayed using HTML entities (e.g., ©, <, >).
4. Lists:
    - Ordered List (<ol>): Numbered items.
    - Unordered List (<ul>): Bulleted items.
    - Description List (<dl>): Term and description pairs.
    - Nested List: A list inside another list.
    - Mixed List: Combination of ordered, unordered, and nested lists.
